

## Flavourless E-Liquid Nicotine Shot

As many members of the vaping community are aware, the law surrounding vaping products has changed with the implementation of the Tobacco Products Directive (TPD). Restrictions on your favourite nicotine-containing e liquids are already in place which limit the maximum size of a refill container to 10ml. We are pleased to offer a convenient alternative to the size restrictions which allows you to still enjoying vaping as you always have done.

We have a solution. "Hot Shot"

Hot Shot is a flavourless high VG TPD compliant e-liquid with 18mg nicotine content.

### Instructions for use:

#### Step 1:

Hot Shot is a flavourless high VG TPD compliant e-liquid with 18mg nicotine content.

#### Step 2:

Simply add the Hot Shot 18mg nicotine shot to 50ml of nicotine free liquid, and this will give you a 60ml liquid with 3mg nicotine content.

#### Step 3:

Once you have added Hotshot to your juice, make sure you shake your newly-prepared liquid very thoroughly. We recommend shaking for a minimum of 15 seconds to achieve the perfect blend.
